

March

We launch our **Positive Motion 2030 strategy** to become a leader in the energy transition.

May

We start dismantling the Tenerife Refinery.

September

For the first time, we successfully test the use of **2G biofuels** for maritime transport in Spain.

October

We convert our €2 billion syndicated loan into a **sustainable loan**.

November

More than 200 flights take off from the Seville Airport with our **2G biofuels**.

December

We unveil the Andalusian Green Hydrogen Valley, the largest green hydrogen project in Europe, and subsequently sign agreements with Fertiberia, Enagás Renovables, Alter Enersun and EDP.

2022

March

We agree the sale of exploration and production assets in Abu Dhabi to Total Energies.

We obtain a favourable **environmental impact statement** for the development of solar farms (2GW).

International ESG rankings **recognise our leadership in sustainability**.

June

We present the first **green hydrogen corridor** between northern and southern Europe, linking the ports of Rotterdam and Algeciras. We agree the development of the largest green ammonia plant in Europe.

October

We market **2G biofuels** at more than 60 Spanish ports.

The EIB grants us a €150 million loan to promote electric mobility in Spain and Portugal.

Start of the installation of **ultra-fast chargers**.

November

We test the supply of **2G biofuels** in the rail sector.

We start to market **100% renewable diesel (HVO)** to professional transport customers.

December

We announce the development of **the largest green methanol plant in Europe**.

2023

February

Together with Bio-Oils, we begin construction of a new **2G biofuels plant** for the development of the largest complex in southern Europe.

May

We agree the sale of our exploration and production assets in Colombia and Peru.

June

We launch Cepsa Light Up, our startup accelerator to drive the energy transition.

July

We agree the development of **biomethane projects** with PreZero, a market in which we aim to develop around 30 plants.

August

We agree the sale of our butane, propane, and autogas affiliate (Gasib).

October

We make SAF available for sale at seven major Spanish airports both on the Peninsula and its main islands.

We launch the Next Lab-R Low Carbon product, the first surfactant with a negative carbon footprint for detergent* production.

*Negative carbon footprint from raw material sourcing through to product manufacture.

We launch our new brand: **noeve**
