

Moeve Celebrates 20th Anniversary of Energy Campus with Closing Ceremony Hosted by Comedian Jorge Marrón

- **The Juan Luis Galiardo Theater in San Roque was packed to commemorate two decades of this educational program that brings the energy sector closer to students from Huelva, Malaga, and Cadiz**
- **The Nuestra Señora de los Milagros School (Algeciras), IES Carlos Cano (Los Barrios), IES Santiago Ramón y Cajal (Fuengirola), and Doctor Rodríguez Delgado de Ronda (Malaga) were recognized for their projects related to Moeve and the energy transition, and received their awards on stage**

The closing ceremony of this edition of Moeve's Energy Campus in Campo de Gibraltar (Cadiz) was a special one, as it was led by comedian and science communicator Jorge Marrón, well known for his appearances on the TV show El Hormiguero on A3 Media.

This year marks the 20th anniversary of the company's educational program in Andalusia, which has been bringing the energy sector—and now the transition to more sustainable energy—closer to middle school, high school, and vocational students from Huelva, Malaga, and Cadiz. San Roque and its energy park concluded this edition with a total of 1,270 students from the provinces of Cadiz and Malaga, along with 65 teachers from 46 schools.

On this special occasion, celebrating two decades of education, community engagement, and transparency, students participating in the Energy Campus were invited to take part in the closing ceremony, sharing laughter and applause with Jorge Marrón. The comedian presented awards to the top projects, performed a live experiment on stage, and highlighted the importance of science, especially the value of perseverance in the face of failure and learning to manage frustration.

The students were accompanied by the Deputy Representative of the Andalusian Government, Javier Rodríguez Ros; the Mayor of San Roque, Juan Carlos Ruiz Boix; the Councilors for Education and Culture, Mónica Córdoba and Ana Ruiz; the Director of the San Roque Energy Park, Rosendo Rivero; as well as the Heads of External Communications and Institutional Relations for Andalusia and Cadiz, Jesús Velasco and Estrella Blanco, respectively.

Blanco emphasized that "Moeve's strong, 20-year commitment to outreach and transparency truly deserved a special closing event. This has highlighted that science can be fun and engaging, and that trial and error is part of life. It helped us finish the course on a high note and set our sights on the next edition."

The initiative consists of a series of lessons and exercises on the Energy Campus website that are carried out in the classroom under the guidance of a teacher, as well as a visit to the San Roque Energy Park. In this edition of the Energy Campus, these sessions on the energy sector in industrial facilities finished with Getares de Algeciras High School (Cadiz).

The objective of this Moeve educational program is to show students the evolution of energy throughout the history of humankind, and to connect them with the Moeve value chain. The company teaches about the impact of crude oil and its derivatives and how they are applied in everyday life, in addition to a commitment to the energy transition through the 2030 Positive Motion Strategy. It will use this to invest up to 8 billion euros to become a leader in sustainable mobility, green hydrogen, and advanced biofuels in Spain and Portugal, putting customers at the center of its activity and helping them to decarbonize.

Moeve's commitment and responsibility to the populations of the areas it's located in is also addressed in this program, in addition to the safety of people, facilities, and nearby population centers, as well as its continuous efforts to protect and reduce its footprint on the environment.

The Energy Campus also addresses Moeve's commitment to the Sustainable Development Goals (SDGs) of the United Nations (UN), and has a special chapter dedicated to the company's responsibility to its professionals, work-life balance, and diversity and inclusion.

Winners

At the end of the training program, students were invited to individually and collectively participate in a competition with projects related to the aspects of the energy sector addressed during the Energy Campus.

The jury, made up of Education Councilor of San Roque, Mónica Córdoba; the Energy Campus monitor, Ana María Benítez; Moeve's Antonio Palma professional; and Moeve's head of External Communication and IR, Estrella Blanco, already announced the awards of both the initiative and the Wetlands event for elementary school students.

The jury selected the projects of a total of 15 young people for their effort, innovation, and creativity in depicting the energy transition and the biodiversity of wetlands.

Students Claudia Ruiz, Yasmina Douali and Alejandro Rosando from Santiago Ramón y Cajal High School in Fuengirola (Malaga), were declared winners in the group category of the Energy Campus project competition for their project *Water Condition*. The second prize was awarded to the group formed by Ruben Funes, Adrián Cuevas, Francisco Javier Guitar and Lina Nasser el Battioui from this center, for their project *Development of Biofuels and Ecological Fuels*. Third place was awarded to Juan Palomar González, María Perea, Juan Francisco Buendía, Natasha Sánchez, and Javier Vázquez for their '*Juego de la oca*' game

about green energies from Nuestra Señora de los Milagros School in Algeciras (Cadiz).

The individual category of the contest was awarded to Irene Lopera from Doctor Rodríguez Delgado High School in Ronda (Malaga) for her Electropoint Moeve project, while second place was awarded to Daniel Reula from Carlos Cano High School in Los Barrios (Cadiz) for his project *Renewable Energies*. A third prize was not awarded.

Moeve is a global company comprising over 11,000 employees, committed to sustainable energy and mobility, with the ambition to drive Europe's energy transition and accelerate decarbonisation both within the company and for its customers

After leading the energy sector as Cepsa for more than 95 years, the company launched its new brand, Moeve, in October 2024. This new identity reflects the acceleration of its transformation to lead in the production of sustainable energy powered by green molecules, including green hydrogen and second-generation biofuels, as well as sustainable chemical products. It is also developing an extensive network of ultrafast electric chargers in Spain and Portugal to boost sustainable mobility.

Through its 2030 *Positive Motion* strategic plan, Moeve is working to transform mobility and energy to create a better world, ensuring today's energy supply while focusing on sustainable energy solutions for the future.
