

Moeve appoints Antonio Joyanes Executive Vice President of Energy Parks and Exploration & Production

- **Alex Archila, who has led the Exploration & Production division for the past 5 years, begins his professional retirement after an international career spanning more than four decades in the industry.**

Antonio Joyanes will be the next Executive Vice President of Energy Parks and Exploration & Production of Moeve effective September 30. Joyanes, who is currently in charge of Energy Parks, will also oversee the Exploration & Production division as part of the Management Committee.

Joyanes is an industrial engineer with a long career at Moeve. Since arriving at the energy company in 1996, he has held various roles in different areas, including at La Rábida Energy Park (Huelva), in Canada, and in Madrid, and currently serves as Executive Vice President of Energy Parks.

Alex Archila, who has served as Executive Vice President of Exploration & Production for the last 5 years, will begin his professional retirement after more than 42 years of international experience in the industry.

Maarten Wetselaar, CEO of Moeve, highlighted Alex Archila's important contribution to the company's transformation, saying: "Since his arrival, Alex has been a committed and active member of our Management Committee and a role model for all, exemplifying human qualities, leadership and a commitment to industrial safety. His contributions have been especially valuable during a period marked by significant changes for the business and the Exploration & Production team as we move forward in our Positive Motion transition."

Moeve is a global company comprising over 11,000 employees, committed to sustainable energy and mobility, with the ambition to drive Europe's energy transition and accelerate decarbonisation both within the company and for its customers

After leading the energy sector as Cepsa for more than 90 years, the company launched its new brand, Moeve, in October 2024. This new identity reflects the acceleration of its transformation to lead in the production of sustainable energy powered by green molecules, including green hydrogen and second-generation biofuels, as well as sustainable chemical products. It is also developing an extensive network of ultrafast electric chargers in Spain and Portugal to boost sustainable mobility.

Through its 2030 Positive Motion strategic plan, Moeve is working to transform mobility and energy to create a better world, ensuring today's energy supply while focusing on sustainable energy solutions for the future.
