

Moeve earns Platinum Medal in EcoVadis Sustainability Rating

- **The company has achieved its highest score on the EcoVadis sustainability assessment, earning 86 out of 100 points and securing a place in the top 1% of companies worldwide**
- **Moeve ranks among the top performers in its sector in key ESG ratings such as S&P, Sustainalytics, Clarity AI, and EcoVadis, reinforcing its leadership in sustainability at both the European and international levels**

Moeve has been awarded the EcoVadis Platinum Medal, the highest distinction granted by the global sustainability assessment platform that evaluates the environmental, social, and governance (ESG) performance of over 50,000 companies worldwide. With this rating, Moeve ranks among the top 1% of the most sustainable companies globally.

The company earned a score of 86 out of 100, 11 points higher than in 2024 and 23 points above its 2021 result, progressing from the Gold to the Platinum Medal. It's also worth noting that Moeve's Chemicals business earned the same recognition in 2024, highlighting its transition toward more sustainable practices and placing it among the top 1% in its sector worldwide.

This recognition highlights the way Moeve has integrated sustainability as a strategic, cross-cutting pillar and reflects the company's firm commitment to ESG principles in line with its *Positive Motion* strategy. This achievement marks another step forward in Moeve's goal of becoming a leading player in Europe's energy transition.

Carmen de Pablo, CFO and Director of Strategy and Sustainability at Moeve, stated: "Sustainability is at the core of our strategy and informs every decision we make. Independent assessments such as those from EcoVadis allow us to measure, validate, and strengthen the progress of our roadmap in these matters. These results reflect the high standards and deep commitment we bring to every action, and they inspire us to continue pushing forward with rigor and innovation toward our purpose."

Moeve's excellence in sustainability management has also been recognized by S&P Global. In its latest assessment, the energy company achieved its highest score to date in the S&P Global Corporate Sustainability Assessment (CSA), standing out in key areas such as climate strategy, risk and crisis management, and tax strategy. This performance ranks Moeve first in its sector for sustainability

in Europe and second globally. Carmen de Pablo, CFO and Director of Strategy and Sustainability, accepted the award last week at the S&P Sustainability Yearbook gala, where Moeve was honored for ranking in the top 5% of its sector worldwide.

These accolades are the latest in a growing list of international ESG recognitions received in recent months. The company currently holds the top global position in its sector in Sustainalytics for the fourth consecutive year, and in Clarity AI for the third.

About Moeve

Moeve is a global company comprising over 11,000 employees, committed to sustainable energy and mobility, with the ambition to drive Europe's energy transition and accelerate decarbonisation both within the company and for its customers.

After leading the energy sector as Cepsa for over 90 years, the company launched its new brand, Moeve, in October 2024. This new identity reflects the acceleration of its transformation to lead in the production of sustainable energy powered by green molecules, including green hydrogen and second-generation biofuels, as well as sustainable chemical products. It is also developing an extensive network of ultrafast electric chargers in Spain and Portugal to boost sustainable mobility.

Through its 2030 Positive Motion strategic plan, Moeve is working to transform mobility and energy to create a better world, ensuring today's energy supply while focusing on sustainable energy solutions for the future.
