

Moeve Renews Quality Certification for the San Roque Energy Park Maritime Terminal

- **The Spanish Port Authority gives this recognition to put the spotlight on organizations that voluntarily contribute to improving port services**
- **The company has renewed this certification for the 12th consecutive year, as a result of its commitment to the sustainability and safety of its operations in the Bay of Algeciras**

Moeve has renewed its certification for the San Roque Energy Park (PESR) maritime terminal in accordance with the *Service Quality for Bulk Solid and Liquid Cargo Traffic* standard from the Spanish Port Authority, having successfully completed the annual audit conducted by external verification entity AENOR.

This is a voluntary certificate that validates the quality of maritime concession service provision from various perspectives: adequacy of facilities and infrastructure, resource management, operational safety, merchandise services, including billing and productivity, and customer service. This standard, which has been renewed for 11 consecutive years, validates the quality of port terminal concessionaires and service providers in ports of general interest.

In this annual evaluation, conducted by AENOR with participation by different Moeve divisions, all activity-related aspects on the dock and the single buoy mooring were addressed from the point of view of operations, safety and prevention measures, customer service, and facility maintenance, among others.

The manager of Maritime Terminals at Moeve, José Manuel Fernández-Sabugo, states that "sustainability, from every perspective, in the operations carried out in the Bay of Algeciras is a commitment of this company, which also certifies this renewal, achieved year after year, because continuous improvement and the quality of the services we provide at the San Roque Energy Park dock are essential for Moeve".

Throughout the year, Moeve submits the main aspects that govern its activity—safety, sustainability, quality and energy efficiency—to various internal and external audits across its facilities that accredit the excellence of its management and production processes.

Moeve is a global company with over 11,000 employees, dedicated to advancing sustainable energy and mobility. Its ambition is to be one of the drivers of the energy transition in Europe and accelerate its decarbonization and that of its customers.

After more than 90 years as a benchmark in the energy sector as Cepsa, it launched its new brand, Moeve, in October 2024, and this reflects the acceleration of its transformation to lead the production of sustainable energies based on green molecules, such as green hydrogen and second-generation biofuels and the production of sustainable chemical products. Moreover, the company is developing an extensive high power electric charging network in Spain and Portugal in order to promote sustainable mobility.

Through its strategic plan for 2030, *Positive Motion*, Moeve works to transform mobility and energy to improve the world, ensuring today's energy supply while prioritizing the transition to sustainable energy for the future.
