

Moeve's positioning and strategy on biodiversity

HSEQ

Positioning

Moeve recognizes the importance of biodiversity management as the basis of ecosystem services that support the availability of clean air, water, soil and, in general, of the resources needed to preserve the natural balance necessary for life.

In addition, it assumes the ethical dimension of biodiversity preservation in order to be able to pass on to future generations a world with the same conditions of natural wealth that we received.

Moeve aspires to become a leading player in the energy transition for the sustainable development of the societies and economies in which it develops its business, while reducing its environmental footprint and committing not to deforest. Moeve supports the need for a reduction in global deforestation to mitigate climate change and biodiversity loss, commits to reduce deforestation associated with the product developed, marketed and/or sold and to extend this commitment throughout its value chain.

To achieve this ambitious goal and in accordance with Moeve's Code of Ethics and Conduct, Moeve's Biodiversity Policy and Moeve's Supplier Code of Ethics and Conduct, the company is committed to ensuring that all our relevant products are produced in accordance with EUDR regulations and are aligned with responsible and sustainable practices. This commitment extends throughout the entire supply chain.

Palm oil and soybean oil are two of the most important and versatile renewable vegetable oils for producing various biofuels, hydrotreated vegetable oil and oleochemicals.

Moeve is committed to the responsible sourcing of sustainable palm oil and soybean oil in its operations.

Scope

Este posicionamiento se extiende a todas las entidades del grupo Moeve sobre las que existe control efectivo u operativo, salvo que existan otros compromisos o acuerdos expresos, en cuyo caso Moeve hará los mejores esfuerzos para la adopción de este posicionamiento.

Commitment

Moeve wants to ensure that its renewable palm-based products, soybean oil and derived products are deforestation-free and traceable while promoting transparency in the supply chain.

Moeve strives to collaborate with its suppliers to cover, at a minimum, the following aspects:

- Palm oil, soybean and derivatives are produced on land that has not been subject to deforestation after December 31, 2020.
- They have been produced in accordance with the relevant legislation of the country of production.
- They are covered by a due diligence statement.

Respect human and labor rights, including the rights of indigenous and local communities.

Traceability, compliance and transparency

Moeve will promote and assist its suppliers (from origin), including as far as possible smallholders, to build a fully traceable and transparent deforestation-free network for palm and soybean oils.
